Development Guide
Weekly Status

What We Did This Past Week

Mike started work coming up with a plan for a call for volunteers. The upcoming US holidays are perhaps not the best time to ask people for additional time!

Call for volunteers!

We're gearing up to begin work on the next version of the development guide. Interested in contributing? Email Mike so we can get an initial idea of how we'll divvy things up. We'll work on assignments as we firm up our work plan.

What's the plan for the next version of the guide?

It is proposed that the Development Guide move to be the detailed design guide for the Application Security Verification Standard's requirements. We can be a superset of that standard, but at a minimum, we need to cover off every single control mentioned in the ASVS. I still want us to donate any material that is testing or review related to the other Guides to trim down our total size. Questions/Suggestions? Email the list and let's discuss!

Where To Go From Here

OWASP is the premier site for Web application security. The OWASP site hosts many projects, forums, blogs, presentations, tools, and papers. Additionally, OWASP hosts two major Web application security conferences per year, and has over 80 local chapters. The OWASP web site can be found here.

Action Items

Action: List members, please check in, and let us know your interest and availability to work on the next release of the guide.
